WORKING EXPERIENCE

Since 2005 I'm running my own small freelance business, called Akleo. I used to work by myself being responsible on every aspect of created websites. Recently I suspended for a while my web-development activity as I've been helping my wife to develop her own company in a small-scale printing industry.

PROFESSIONAL QUALIFICATIONS

- familiarity with the development of complete websites from initial concept through production,
- extensive knowledge of writing cross-browser compliant HTML5, CSS & JS websites,
- bringing forth expertise in design, installation, testing and maintenance of web systems.
- effectively self-managing during independent projects, as well as collaborate in a team setting and work collaboratively with clients to provide rapid and client-acclaimed frontend web development optimizing user experience, search engine rankings, sales and brand positioning,
- creating products that are user-friendly, effective and appealing,
- fixing problems encountered in the functioning of the websites,
- quickly learning new application systems and technologies.
