EXPERIENCE

Since 2005, I have been running my own business as a freelancer. I used to work mainly alone being responsible for every aspect of the solutions I created.

I hope my portfolio is the proof of my abilities.

I decided to open myself up to the opportunities of working in a team to achieve the synergy effect, as well as learning more new things from teammates.

JOB OBJECTIVE

I am looking for the opportunities to improve my skills within the field in a position that I know and like the most - a frontpage developer.

I would like to be a part of the larger team than just myself. I look forward to join a progressive company with opportunities to work on great projects with awesome people.

I am also hungry for new challenges with ready-to-use ability to quickly create ideas and apply appropriate solutions.

EDUCATION

Master of Computer Science,
Specialization: Computer networks,
Technical University of Gdańsk (Poland).

QUALIFICATIONS

- familiarity with the development of complete web solutions from the initial concept, through the development and finally, to the product delivery,
- extensive knowledge of writing cross-browser compliant solutions,
- bringing forth expertise in design, installation, testing and maintenance of web systems,
- effective working with customers to provide rapid and client-acclaimed frontend web solutions that optimize user experience, search engine rankings, sales and brand positioning,
- creating user-friendly and effective products,
- ability to quick learn of the new application systems and technologies.
